

Col. Grenville
Hanover April 12th 1752.

16295

Sir

Hanover April 12th 1752.

As Your Majesty in Your last Letter seemed desirous to receive a regular account of His Royal Highness's state of health, whilst the Cough continued upon him; I think it my duty to send Your Majesty these few lines of information, which I hope will prove satisfactory, having the pleasure to acquaint Your Majesty, that His Royal Highness's Cough is so much diminished, that it may almost be said to have entirely left Him: But as the Cough has been of so long a standing, Dr Zimmerman recommends it to His Royal Highness to persevere in taking the medicines for some little time longer, that nothing may be left undone towards getting entirely rid of it, & to prevent if possible any return.

I have the Honour to be
Your Majesty's most
Obedient Subject, &
Servant, Rich^d Grenville.
