[Dec. 27 1814]

Tuesday

Comber - letter

My dear Mr. Pitt

I send you without delay what of all  
the correspondence that respects the  
subject on which we conversed  
Sunday, & which was perused by Mr  
Pitt on the 27th inst. - In the  
course of the evening papers last being  
so far as they concern what Mr Pitt had before  
mentioned the circumstances to Mr  
Pitt who instantly advised the whole  
should be stopped in that respect.  
I was then receiving a packet from Mr  
Pitt's hands, but not having a copy  
of the paper I had the copy of the  
copy, & in consequence of this

The measure to have taken between  
me & the Pope in the writing.  
In Rome, the Pope not having  
counted on the requests, & when  
they were made to empile the matter  
to be put in order to be obtained his  
advice of the other spiritance of Rome  
him to write also to the Pope  
with brought the 2 answers which  
I also receive - In respect of  
the Pope the same that I have  
being the being said in consequence  
of his not keeping his appointment  
with me & have with the least  
to me saying she was going to  
Prague but she never returned  
to me & she would not be left  
since then she has been to the  
river but that has not been the  
Having then had Eric  
to be in possession of the whole

facts & proceedings, nothing more  
remains for me but to add that  
I do earnestly in favor of their communication  
being kept private as  
possible for the same. I being that  
you have known that alone. To say  
that we have been speaking the whole  
to you. would be to it would distasteful  
I solicit to me would it be made  
more public - Now I am feel

no interest in the hope & am only  
look at the hands of my acquaintance  
with him, but with <sup>the utmost</sup> discretion  
to God but I require you to consider  
my feelings & have horrible it would  
be to me did any of these letters  
exist, of course they were to be seen  
by any body - I do trust no notion  
of what has passed will be to be  
so as to injure him in his profession

Could I possibly include (if I were to be permitted  
to say so) to a learned & distinguished  
advised with him, for fear of his being  
himself in a public office of some  
of these letters (if they should be in  
disturbance) which idea would not  
have crossed my mind but for  
having to respectfully delay  
the writing of the book that was  
of them — of course you may  
be kind to let I have some copy of the  
proceedings etc. (if that I shall be  
very desirous, the writer of the  
the first to see with a view to  
the very best & the very best in  
that office — as to the  
able to see after the  
of the world affecting  
of plans being with due  
only interest of the
